**Course Project Proposal**

- Project Overview

- Goal(s) of the project

- Data Overview (description, pedigree, dimensions) and link to the data source

- What is the outcome variable and what is the task to perform: classification or regression (prediction) – for supervised learning.

- Steps of the analysis

- Appropriate methods to use (maximum methods covered in class):
    - …
    - …
    - …
    - 

- Structure of the final report

- Data details (variables description)
